The Crusades: Map Activity

Directions: Complete the following steps in order. Remember to take your time and be neat and accurate with all labeling and coloring.

STEP 1 – *Labeling* – Label the following physical features on your map:

- Atlantic Ocean
- Black Sea
- Mediterranean Sea

STEP 2 – *Labeling* – Label the following political features on your map:

- Spain
- England
- France
- Holy Roman Empire

STEP 3 – *Labeling* – Place a dot and label the follow cities (note: Label the cities *smaller* than you did with steps 1 and 2):

- Jerusalem
- Paris
- Damascus
- Lisbon
- Antioch
- Rome
- Constantinople
- Belgrade

STEP 4 – *Coloring* – Get *two* different colors. With one of them, *lightly* color the lands under Christian control (“Christian Lands”). Color in the small square next to “Christian Lands” in the legend.

STEP 5 – *Coloring* – With the other color, *lightly* color lands under Muslim control (“Muslim Lands”). Again, don’t forget to color in the small square next to “Muslim Lands” in the legend.

STEP 6 – *Drawing* – Use the maps on pages 327 and 328. Using *four* different colors, *draw in* the routes of each Crusade (1st – 4th). When you are finished, the routes of all 4 Crusades should be clearly drawn, each in a different color. Color the 4 boxes in the legend next to the respective Crusade (for example, if you drew the route of the first Crusade in red, color the box next to 1st Crusade red).

STEP 7 – *Information* – Find the years each Crusade happened. Write the years next to the respective Crusade in the legend.

STEP 8 – *Information* – Under each Crusade (in the legend) there are 3 lines. Your job is to sum up each Crusade in *one sentence* and write down the sentence on these lines. Give people looking at your map a “snap shot” of that particular Crusade.

STEP 9 – *Coloring* – After you are finished with everything else, go back and *lightly* color all the water on your paper blue.
